

Program	First Aid Kits																																																																																																																																					
Guide	First Aid Kit Requirements																																																																																																																																					
Revision Date	1/17/2025	Revision Number	1																																																																																																																																			
Overview	Depending on their needs, divisions, departments, and programs may have a Class A or Class B first aid kit. The division, department, or program is responsible for identifying their department's first aid kit needs, conducting a monthly inspection, and purchasing supplies. First aid kits must be maintained based on the ANSI/ISEA standard. First aid kits must be inspected monthly, and items running low or past their expiration date must be replaced. The monthly inspections must be documented. (ANSI/ISEA Z308.1-2021)																																																																																																																																					
Type of First Aid Kit: Class A and Class B	<p>There are two main types of first aid kits: Class A and Class B.</p> <ul style="list-style-type: none"> Both Class A and Class B kits contain the same supplies but in different quantities. A Class A first aid kit is appropriate for most LCC office locations. A Class B first aid kit is appropriate for areas such as a machine shop or automotive lab with a higher potential for injury. The ANSI standard sets the minimum number of supplies required for each first aid kit. 																																																																																																																																					
Monthly Inspections	<ul style="list-style-type: none"> First aid kits must be inspected monthly by the division, department, or program. A 5-star request can be submitted to the LCC print shop for a 'first aid inspection tag' (either Class A or Class B). It lists the minimum number of supplies required for a Class A or Class B first aid kit and a monthly sign-off.
